

Our business is built on our passion for plants, gardens and everything green. With this background we proudly serve our customers with a unique and practical combination of services and products.

Your garden and your plants are the expression of you being part of the natural, self-sustaining world. We will assist to create, maintain and nurture your dream garden with our creative solutions, trained workforce, modern equipment, and value for money offerings.

Spriggen Gardener
— PRIVATE LIMITED —

Our Vision

To create a country wide business in the gardening sector that contributes to the greening of the planet, benefits people and society and creates value for stakeholders.

Our Mission

Plants are a key factor to sustaining life on our planet. Our Services and Products are crafted with a mindset for people to rebuild a relationship with plants and nature.

**Be the change.
Let's green our planet**

Garden Maintenance

The appearance of good outside spaces makes a dramatic statement. These spaces require regular upkeep to maintain their beauty and functionality. Using an organized team can lead to lower costs. Green Brigade is your one stop solution for all your gardening needs.

AMC packages for hourly, weekly,
daily and one time maintenance and
repair.

Vertical Gardens

Vertical Gardens or Green Walls are a system of growing plants on vertically suspended panels. A remarkable innovation, they seem to fill up large area without occupying much real estate. Green Brigade has the expertise and tools necessary to help you add this lush pop of greenery

Design | Execution | Maintenance

Balcony Gardens

Not having a yard certainly doesn't prevent you from having a garden. Balcony and terrace gardens can be intimate, manageable, useful and absolutely stunning! Whatever the size of your space, we at Green Brigade will help you create your ideal urban oasis.

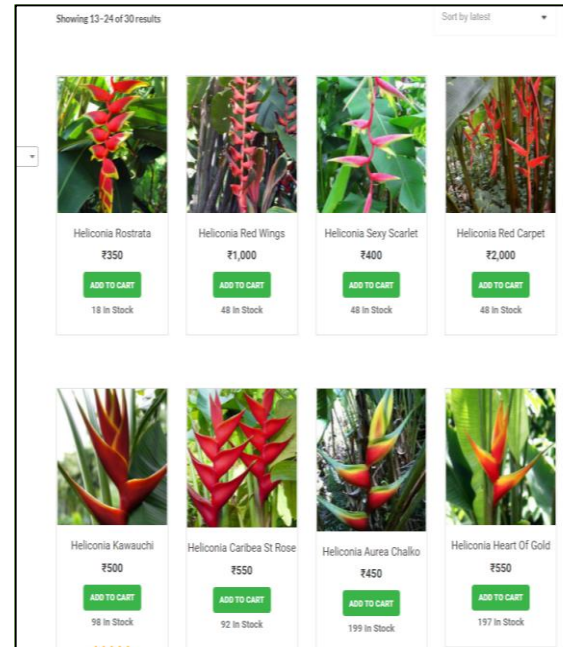

Design | Execution | Maintenance

Miyawaki Forest

Small patches of land can be made into forest patches using all natural elements, to mature in a period of 20-30 years. Species of native plants are planted in close proximity and the plantation becomes 30 times denser, grows 10 times faster and becomes maintenance -free after a span of 3 years.

Groundwork | Plant Sourcing | Planting
Maintenance for 3 years

Online Nursery

We are living in a fast-paced world and almost everything these days is done online. Online plant shopping can be convenient. You can make informed decisions and have a wider variety of plants.

Heliconia | Gingers | Tropical Foliage |
Fruit Plants | Medicinal Plants

Gardening Kits

In raised bed gardening, soil is formed in 3-to-4 feet wide beds, of any length or shape. The soil is raised enclosed by a frame and enriched with compost. Plants are spaced creating a microclimate in which weeds are suppressed and moisture conserved. The raised beds have a long life span with enriching of soil annually. Can be used indoors or terrace with liners.

DIY kits of various sizes in 6, 8 and
12" height and lasts for 15 years

What our clients have to say...

Dear Team,

We feel that it is only appropriate that we express our gratitude for the time and attention that you have provided to our garden throughout the contract period. It must be said that our lawns and plants have never looked as good as they are now. Many of our guests have particularly commented on the impact that the garden now provides. We are so thankful for the services that you provided on emergency situations. The skillful supervision of Mr. Biju who is extremely experienced in gardening needs special appreciation.

We would hope that you would be able to provide us with the same in coming days too.

Thanks & Regards,

Anoop V | EHK

- ✓ Excellent supervisory services to deliver as promised
- ✓ Custom designed packages for client affordability
- ✓ Single source for multiple services and products
- ✓ Company owned 7 acre tropical nursery
- ✓ Committed customer services

Our Commitment To Sustainability

Sustainability means preserving the resources to meet our own needs without compromising the ability of future generations to meet theirs. In addition to natural resources, we also need social and economic resources. Sustainability creates and maintains the conditions under which humans and nature can co-exist in harmony, fulfilling the social, economic and other needs requirements of ours and the generations to come.

At Spriggen, we are on our way to creating a sustainability division that will look into Green Audits and CSR Audits. Further we are in talks for Smart Community projects where sustainability, technology and clean, good living are standards available to all citizens.
